

Center of Science & Industry (COSI) MEET THE INNOVATORS OF HONDA R&D

This project was a collaborative effort between COSI's design and fabrication team together with engineers from Honda of America Research & Development. The project showcases automotive engineering and design and highlights real STEAM career development pathways.

Using hands-on exhibits, video interviews, and detailed models, visitors get an inside view of many aspects of this high tech field. Visitors can experience a crash test simulation, a virtual ATV ride, and experiments with hydrodynamics using a working wind tunnel.

Collaborators:

COSI Design, Fabrication &
Tech Studio
Honda of America R&D
Past Foundation

Size:

1,500 square feet

Scope:

Interpretive Planning
Experience Development
Interactive Development
Project Management
A/V Integration
